-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague and confusing because it attempts to claim both a composition for performing an assay and method of assay. A claim should only be directed to one class of invention, either the composition or the method. The claim also fails to recite any steps in the body of the claim to further define the method. In lines 4-5, the recitation of "the detection agents" lacks antecedent support.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Giese.

Giese (U.S. Patent 4,282,287) teaches a wash buffer comprising PBS (phosphate buffered saline) with bovine serum albumin and Tween-20 surfactant (see col. 5, lines 54-56).

Art Unit: 1641

Since claim 1 is not clear as to what is being claimed, for the purposes of art related rejections, claim 1 is being interpreted as a composition comprising proteins and additives for eliminating non-specific interference. The wash buffer of Giese contains bovine serum albumin which is a protein that is used for blocking non-specific binding reactions and Tween-20 which is considered an additive and can eliminate non-specific interference with its detergent properties.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher L. Chin whose telephone number is (571) 272-0815. The examiner can normally be reached on Monday-Thursday.
